

Living Catalogue

The new range of frame screens
for home cinema

SCREENLINE
the screen makes the difference

Living

Living is the latest line of frame screens for home cinema. The frame is designed for projection with traditional installation or ultra short throw video projectors.

Living

Living curved

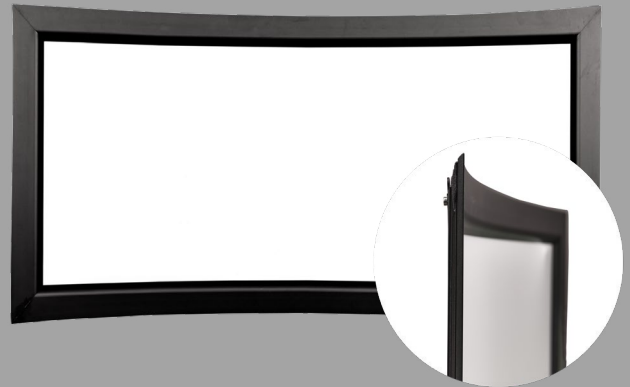

From 200 cm to 450 cm of base

16:9

16:10

4:3

10 cm black frame

10 cm black borders. Available in the traditional version or curved.

It features a profile with an inward 45° angle designed for videoprojection with ultra-short optics which also guarantees a perfect flatness of the fabric placed on the back of the frame.

Living velvet

Living velvet curved

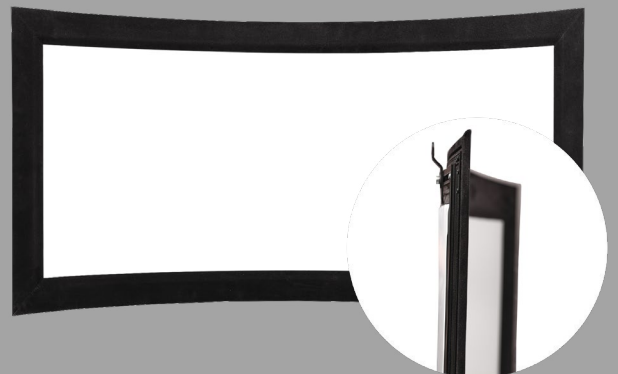

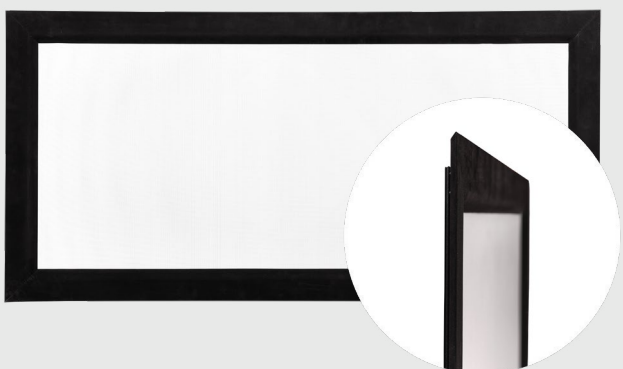

From 200 cm to 450 cm of base

16:9

16:10

4:3

10 cm black velvet frame

10 cm black velvet borders. Available in the traditional version or curved.

The smooth borders with black velvet finish absorb any possible overlapping of the projected image.

Living thin

Living thin curved

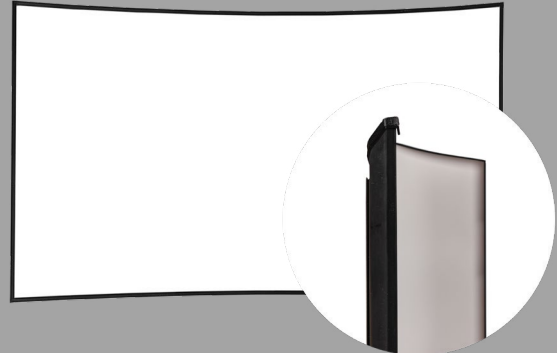

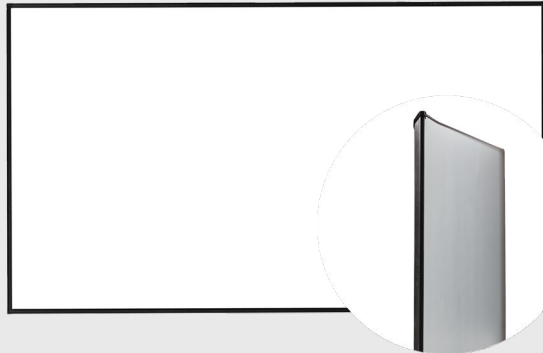

From 200 cm to 450 cm of base

16:9

16:10

4:3

5 mm black frame

5 mm black borders. Available in the traditional version or curved.

The trendy screen in modern home cinema with 5 mm thin frame. This model, paired with high contrast RADIANCE fabrics specific for video projection in normally lit environments, represents the market trend and the maximum evolution of modern home cinema.

Living full vision

Living full vision curved

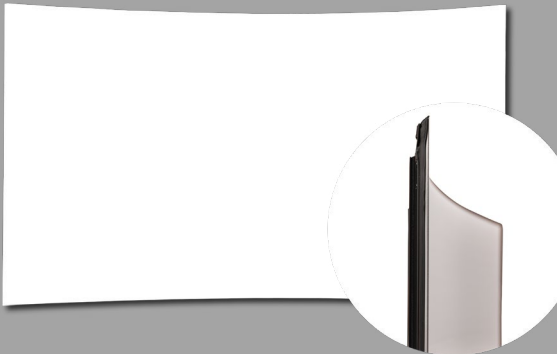

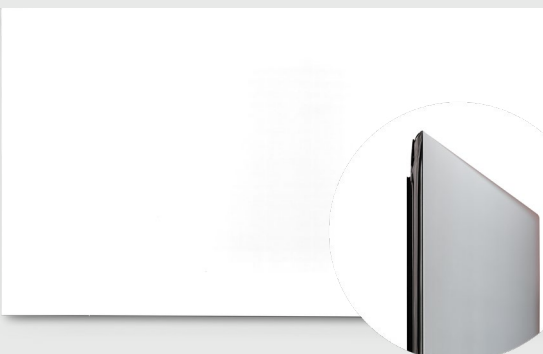

From 200 cm to 450 cm of base

16:9

16:10

4:3

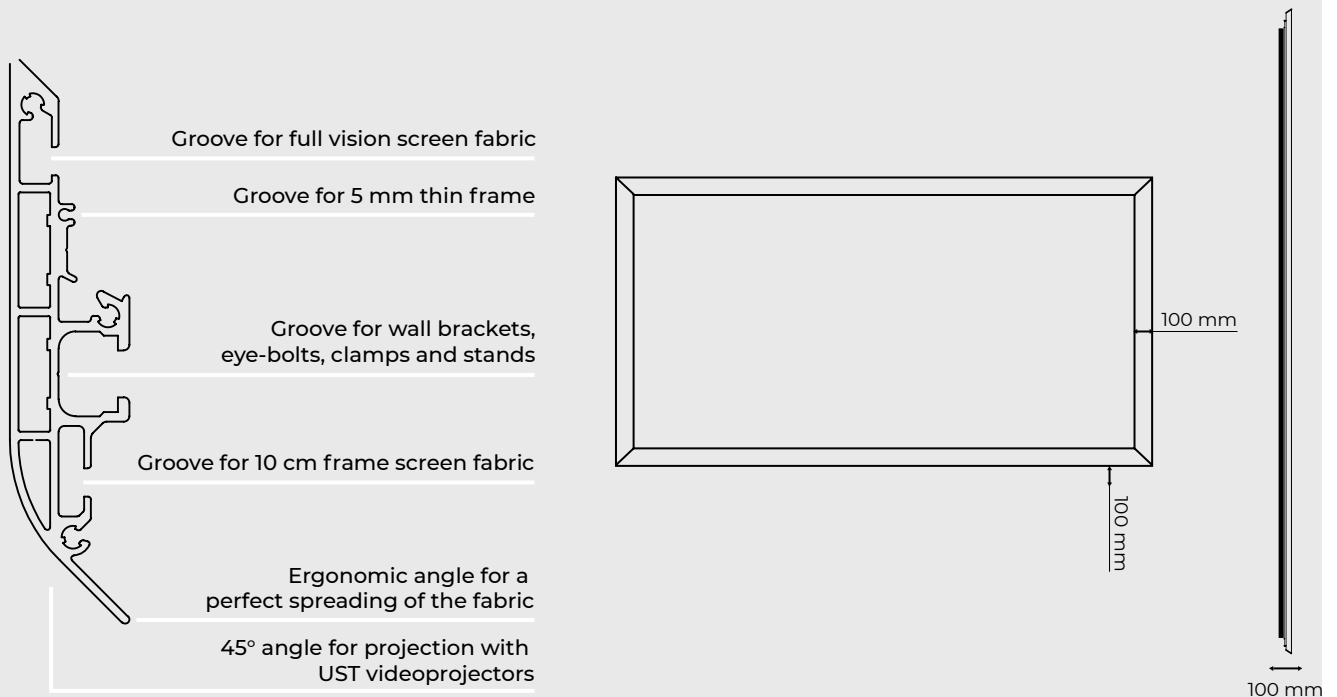

Full vision

No black borders. Available in the traditional version or curved.

Elegant and minimal, it becomes a fine piece of furniture in any living space and design room. It becomes total white or shimmer grey according to the installed fabric.

Technical features

Special fabrics

All LIVING frame screens feature a wide range of traditional PVC fabrics.

This model, combined with the **high-contrast RADIANCE fabrics** specific for video projection in normally lit environments, represents the market trend and the maximum evolution of modern home cinema.

It is important to focus on the **RADIANCE fabric line** dedicated to the projections in ambient light, which perfectly complete the performances of LIVING screens.

Radiance 0.6

Gain	Color front	Color rear	Thickness	Bulk height	Contrast	Brightness	Sound transmitting
0.6	Silver	Silver	500 micron	2300 micron	++	+	×

Radiance 0.6 Microperforated

Gain	Color front	Color rear	Thickness	Bulk height	Contrast	Brightness	Sound transmitting
0.6	Silver	Silver	500 micron	2300 micron	++	+	✓

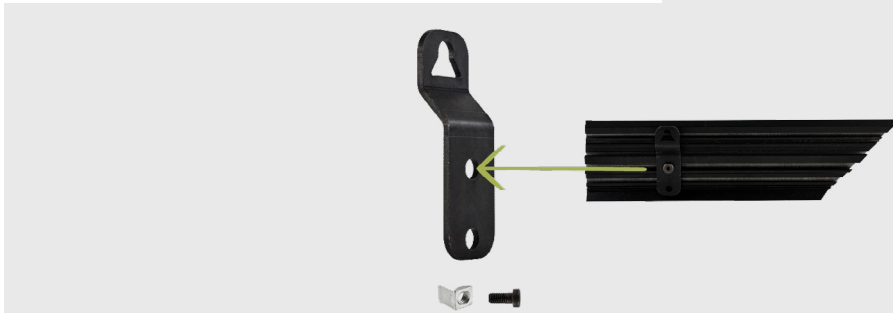

Radiance 0.8

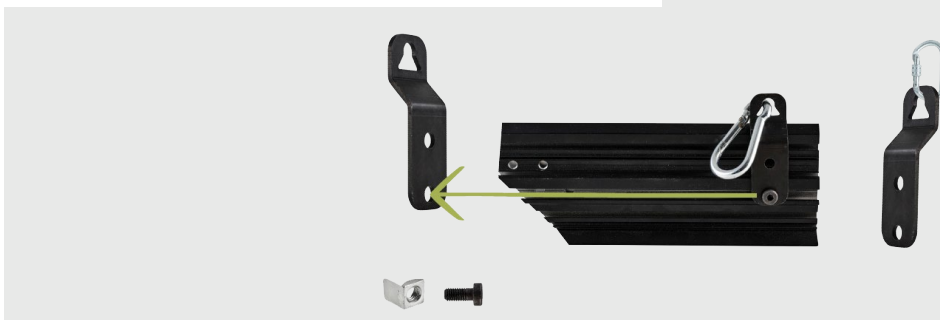

Gain	Color front	Color rear	Thickness	Bulk height	Contrast	Brightness	Sound transmitting
0.8	Silver gray	Silver gray	400 micron	2100 micron	++	++	×

Living full vision

Improved version

- Performance and vigorous profile that allows to reach viewing area base up to 450 m.
- The ergonomical shape of the frame offers a physiological tension of the fabric.
- 45 ° internal angle for a perfect video projection with ultra short throw.
- Great versatility of wall, ceiling installation with truss and wall brackets.
- Recommended in combination with one of the specific high contrast RADIANCE fabrics for video projection in ambient light.
